Applications

Refrigeration and air conditioning industry, plumbing technology, electrical motors

Operating conditions

Silver based brazing alloy, containing phosphorus. Excellent flow, capillarity and mechanical strength characteristics. Used for joining copper and copper alloys. It is not allowed to use this alloy for joining steels, iron, nickel and cobalt as it will be formed brittle phases in the joint. Brazing alloy not allowed to be used while operating in sulphur containing atmosphere, due to the crevice corrosion phenomena.

Recommended fluxes

Due to its phosphorous content, you have not to use an additional flux for brazing only copper to copper.

Heat sources

Flame, induction heating, resistance, furnace under protective atmosphere

Delivery forms

Wire, rods, ribbon, rings, preforms, powder
